```

Constellation Scatterplot

clean up after seeing first zero, and scatterplot In-phase vs Quadrature

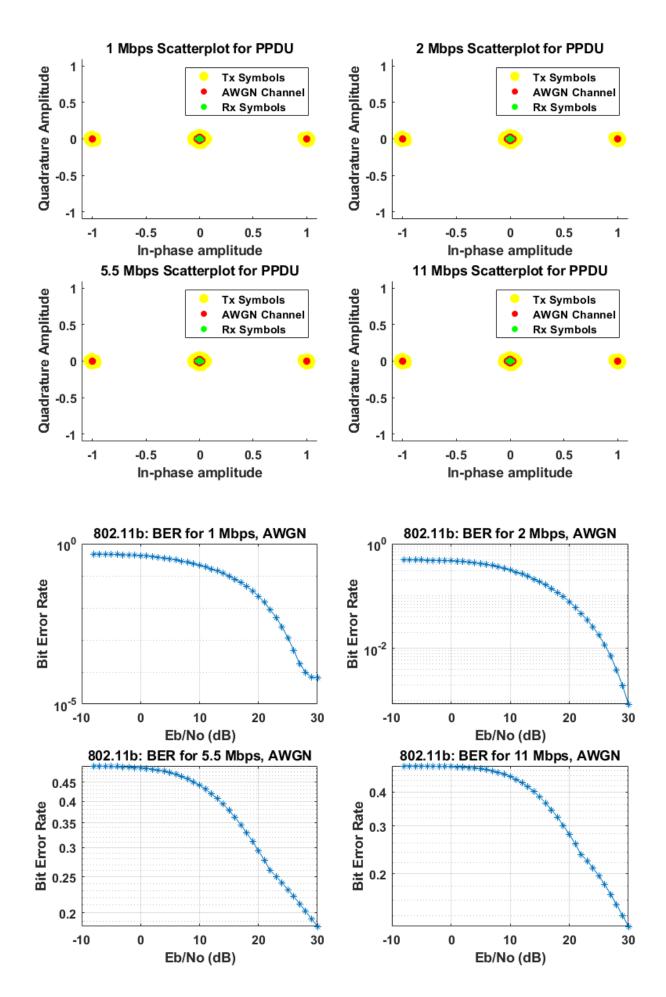

```
figure('Position',[300 300 900 600]); % for scatter plots
for i = 1:size(BERVector,2)
    idxZero = find(BERVector(:,i)==0);
    BERVector(idxZero:end,i) = 0;

fig = subplot(strcat('22',num2str(i)));
    plotScatter(fig, txFrame, txNoisy, rxSyms, dataRates(i));
end
```

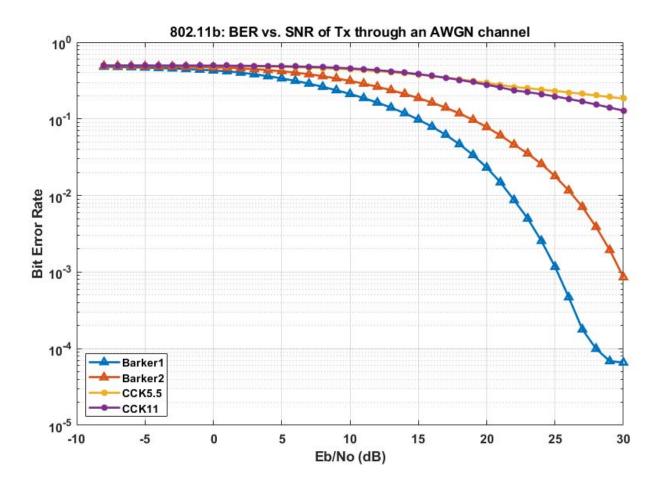

BER curve for each data rate

plot BER curve for each data rate separately

BER curve for all data rates

plot BER curve for all data rates
